

## How to convert Korean-language webpages into English

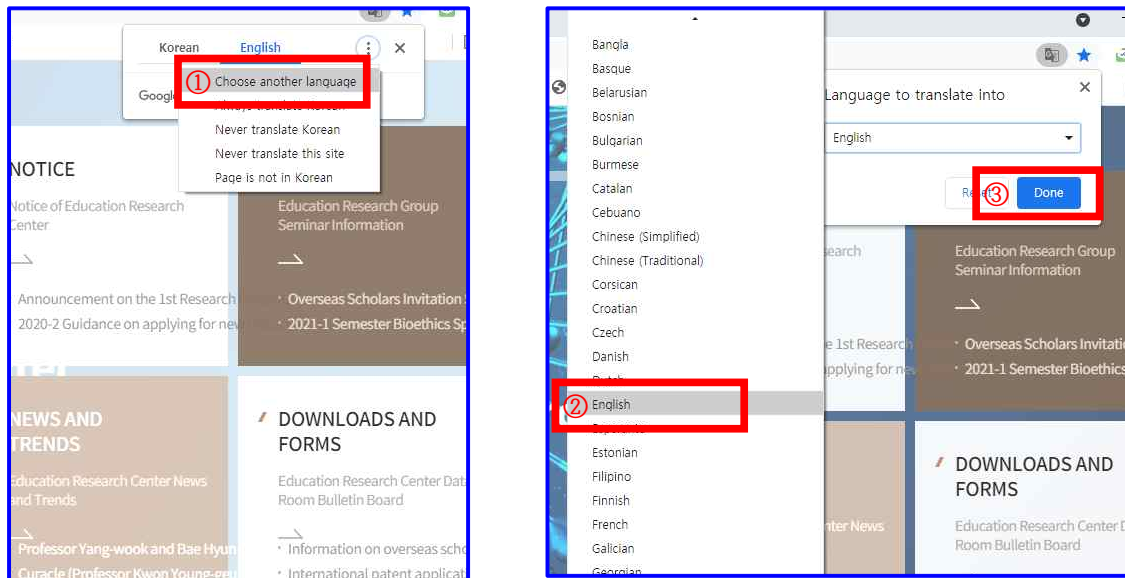

1. Access the site from a Chrome program. (<http://ybri-bk21.yonsei.ac.kr/>)
2. ① Right-click on the page that needs translation and ② click 'Translate to .....'.

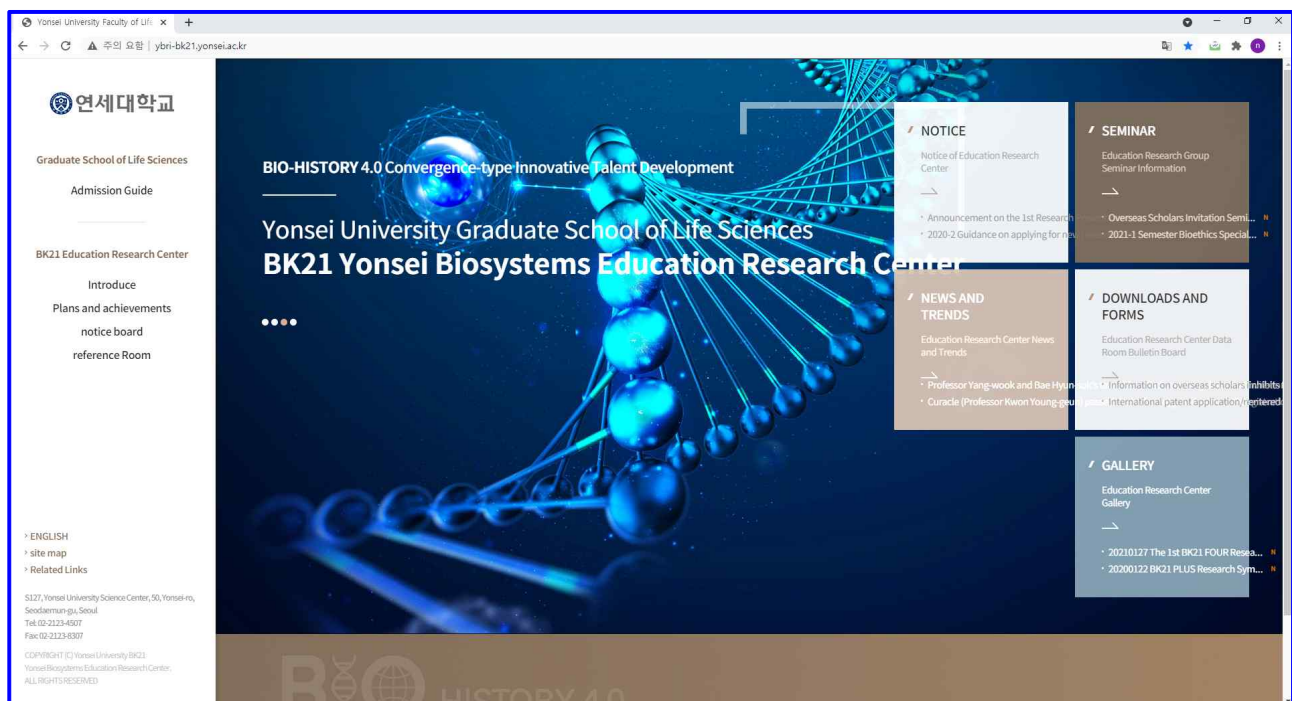

3. Click the three dots (⋮) in the small window on the top right.

4. ① Click 'Choose another language', ② select 'English' as the target language for translation, and ③ click 'Translate' or 'Done'.

5. Screen of Korean page translated into English using Google Translator.

6. If you set steps 2-4 above, you can see the translated screen right away by just using step 2 on another page.

#### ■ Precautions

- Korean Language in the picture cannot be translated.
- Keep in mind that it was translated by Google Translate.
- If it doesn't work, please contact us by email(pumpnara@yonsei.ac.kr).
